To Whom It May Concern, we engaged Pauline Sabin of 'Tenderwise' to put together and submit a major tender in Western Australia for a 5 year contract to sit on a panel of contractors for ongoing maintenance to 800 Government facilities.

At the beginning of the process we soon realised we didn't have the capacity or knowledge to get us over the line in regards to compliance. We were close to not submitting our tender as we believed the time to get it together would have taken 2 full weeks of paper chasing. The details requested were mind-boggling and unlike any other tender we have experienced.

We at the very last few days before the tender closed, decided to go for it, engaged Pauline to take it off our hands and deal directly with the client on our behalf.

Pauline provided us with everything from the completed tender response documents, to our new company health & safety manuals, our company's J.S.As and staff induction manuals etc.

We were successful in our tender and now have a 5 year contract to carry out maintenance works on all Western Australian Schools, Tafe's, Prisons, law courts, fire stations, bus depots, train stations.

This has in turn secured our company with 5 years of ongoing works and we expect this to roll over far into the future.

A handwritten signature in black ink, appearing to read "Mickey Curran", is written over a light blue rectangular background.
